# Hunter KDS II-Plus Fully Integrated Alignment

## Streamline the alignment process with KDS II-Plus F.I.A. Systems

Hunter KDS II-Plus alignment systems are designed to meet the strict requirements of BMW workshops and provide high-precision alignments. New capabilities now integrate the functions of the console, sensors and lift into one highly efficient system to increase productivity.

- A BMW-customized version of Hunter's WinAlign® software meets the specifications of all BMW vehicles, including those with single-joint, spring-loaded front axles and multi-link rear axles with spherical kinematics.
- Lift-activated KDS II-Plus digital imaging alignment sensors speed alignments using a patented four-camera system that continuously monitor targets at each wheel.
- Live Ride Height Measurement automates BMW ride height adjustment procedures, saving time and eliminating potential errors from manual measurement and data entry.

1-KDS-R6 system shown with optional 1-RXBMWWT scissor lift.

### 1-KDS-R6

**\$29,180.00**

List Price \$30,212.00

## RXBMW Scissor Lift

The Hunter RXBMWWT scissor lift provides ample lifting capacity in a space-saving design and offers optional features that automate manual tasks and simplify procedures.

- The compact scissor design requires minimal bay length, yet lifts up to 9,900 lbs.
- Two 6,000-lb. capacity swing air jacks come standard to lift vehicles off the runways.
- Runways are level to within 0.5 mm from side to side and include ultra-low-friction slipplates.
- Optional PowerSlide system auto-locks turnplates and slipplates, removing the hassle of lock-pins.
- Set tire pressure quickly without cumbersome hoses and gauges with optional Inflation Station.
- Optional lift brackets store targets and wheel adapters within arm's reach of each wheel to save steps.
- At no additional cost, RXBMW may be installed in a shallow pit that sets the runways flush to the floor when fully lowered. This clean installation eliminates the need for long approach ramps and saves space.

### 1-RXBMWWT

**\$30,437.00**

List Price \$31,511.00

### Other RXBMW models available:

#### 1-RXBMWWT-PS

Includes PowerSlide slipplates and turnplates

**\$33,075.00**

List Price \$34,242.00

#### 1-RXBMWWT-IS

Includes PowerSlide slipplates and turnplates and Inflation Station

**\$34,374.00**

List Price \$35,587.00

#### Add F (ex. 1-RXBMWWT)

Shallow-pit flush-mount installation for any RXBMW model at no additional cost.

Engineering Company

Hunter has additional KDS systems and accessories available. Contact your local BMW Equipment Program representative for more information.

## Ensure a Smooth Ride With Hunter Wheel Service Equipment

### GSP97BMW Road Force® System

Hunter's GSP97BMW performs a simulated road test on the wheel assembly to quickly identify and diagnose tire/rim-related vibration and tire-pull problems. Each GSP97BMW model includes proper adapters for BMW vehicles.

- The Road Force system "road roller" applies up to 1,250 pounds of pressure against the wheel assembly to detect non-balance-related issues.
- SmartWeight® balancing minimizes correction weight usage and maximizes productivity by reducing wheel weight costs by 33% or more and speeding service.
- StraightTrak® LFM assesses the lateral forces in tires that cause pulls and drifts and provides corrective measures to minimize the problem.
- The ForceMatching® procedure finds the stiffest area of a tire's sidewall and the lowest spot on a rim to be match-mounted to cancel vibration caused by radial force variation.

#### Also Available:

1-GSP972207BMW

Includes integrated wheel lift.

**\$14,032.00**

List Price \$14,528.00

1-GSP972205BMW

**\$12,694.00**

List Price \$13,142.00

### Auto34 Tire Changer

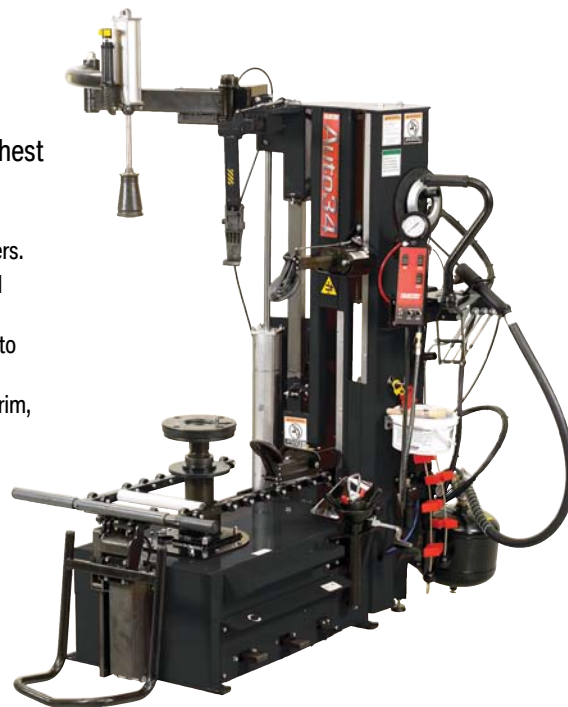

Hunter's Auto34 Tire Changer services the toughest wheel combinations with effortless operation.

- Automated functions and unique design elements help service rims up to 34 inches without the use of bead levers.
- The self-inserting, ultra-thin tool head safely mounts and demounts tires in one fluid motion.
- A powerful motor exerts over 850 foot-pounds of torque to service even the most stubborn tire beads.
- The bead-loosening rollers gently roll the bead from the rim, yet are strong enough to safely hold the tire to complete match-mounting procedures.
- Only three switches and one foot pedal control virtually all tire changing operations.
- Optional pneumatic wheel lift available.

1-TCA34WBMW

**\$19,200.00**

List Price \$19,888.00

Hunter has additional wheel balancing accessories available. Contact your local BMW Equipment Program for more information.

# BMW Tool Storage System

## LISTA CABINETS.

## The Standard in Organized Tool Storage.

688-BMWREQHW-2/24

- Tools are organized to a specific location based on the length, width and height of the tool to maximize cabinet storage space; each tool is given a location.
- Designed with expansion room built in for future required tools.
- Stores over 680 tools.
  - 421 current required tools.
  - Approx. 268 tool spaces for expansion (subject to change based on the actual size of future tools released).
- The two top shelf units provide an additional 4 shelves with 24 square feet of storage for larger tools.
- 22 full extension drawers 36" wide x 24" deep; 56,911 cubic inches, 19,158 square inches.
- Drawer layout sheets provided to give quick reference to tool locations by drawer (this is an 8.5x11" sheet per drawer, not a drawer inlay sheet).
- Required tool list printed by order number and 6-digit part number showing cabinet and drawer location of each tool.
- Supplied drawer dividers for each tool come with part number labels.
- Essential tool database software available\* (free of charge) – requires Microsoft Access® database software (not provided). Database allows for: lookup of tools, tool location, tool pictures, etc.; Tool check-in and checkout functionality; Ability to add additional special tools inventory you have at your dealership. Software is free of charge with the purchase of the tool storage cabinets.
- Drawer fronts are labeled with full-length drawer labels which include the BMW® logo, drawer and cabinet number.
- Partitions are factory-installed for easy tool loading.
- All cabinets are BMW Anthracite Gray.
- All locks in set are keyed alike.
- Includes mesh drawer liners.
- 440 lb. per drawer weight capacity.
- Pallet truck base system for access to move cabinet.
- **WARRANTY:** Limited Lifetime.

\* This database is to be run locally at your dealership and is not a web based or corporate managed software system. Database support beyond providing current release and download at time of purchase is not provided by this program.

# Tool Storage for Current and Future Requirements

## BMW Tool Storage System

688-BMWREQHW-2/24

**\$6,310.00**

List Price \$6,690.00

- Storage for current BMW required tools plus expansion for small, medium and large future required tools.
- 22 drawers with compartments for over 680 tools.
- Top shelf cabinets for larger tools include two locking cabinets with double-hinged doors, bottom shelf and one adjustable shelf and pre-bolted at factory.
- 56,911 cubic inches, 19,158 square inches in drawers.
- Overall dimensions 6' 8.5" wide x 28.5" deep x 88" high.

## BMW Optional Tool Storage System

688-BMWOPTHW-1/10

**\$3,099.00**

List Price \$3,310.00

- Storage for additional/optional/legacy BMW special tools. This cabinet provides expansion for additional tools outside the current required BMW Tool List.
- 10 drawers with compartments for approx 295 tools (tool size dependent).
- Top shelf cabinets for larger tools include one locking cabinet with double-hinged doors, bottom shelf and one adjustable shelf and pre-bolted at factory.
- 29,142 cubic inches, 8,708 square inches in drawers.
- Overall dimensions 3' 4.25" wide x 28.5" deep x 88" high.

- Essential tool database allows for lookup of tools, tool location, tool pictures, etc. with tool check-in and check-out functionality.
- Ability to add additional special tools inventory at your dealership.
- Drawer fronts are labeled with full-length drawer labels which include BMW® logo, drawer and cabinet number.
- Software is free of charge with the purchase of the tool storage cabinets.

CABINET 1 - DRAWER 1									
5	6	5	5	6	4	4	9	4	36

Drawer layout sheets (8.5" x11") give quick reference to tool locations by drawer (this is not a drawer inlay sheet).

# Serious Lift Capability

## SmartLift® In-Ground Lifts

With over 50,000 units in operation, a self contained and environmentally-friendly operation, this lift has become the preferred choice in new facility construction.

- The TRIO™ SmartLift features a low-profile yoke design and greater drive-thru clearance than other models.
- The new arm design has 18% more reach with a shorter arm!
- Multi-position adapters have finite adjustment, allowing pinpoint placement of adapter to lift point.
- Retains all features of previous generation SmartLifts, including total containment, ease of service, and optional Liquid Detection System™ (LDS).

**39-SL210W-RA**

10,000 lb. capacity, wide drive-thru in-ground lift with Trio arms and rubber adapters.

**\$7,228.00**

List Price \$7,821.00

**39-SL210iW-RA**

10,000 lb. capacity, wide drive-thru in-ground lift with Trio Arms, LDS and rubber adapters.

**\$7,528.00**

List Price \$8,145.00

**39-SL210-MP8**

8,000 lb. capacity in-ground lift with moveable pads (does not include TRIO arms).

**\$7,228.00**

List Price \$7,820.00

A surcharge of 3.2% will be added for shipping and handling.

## THE NEW SMARTLIFT® TRIO™

Shown: Model 39-SL210iW-RA with optional accessories.

## Introducing The World's Fastest Lift!

Shockwave™ Equipped Rotary Lifts will help you achieve your goals of greater technician productivity and higher profits. Designed for fast-service bays, these lifts are the fastest in the world. Only available from Rotary.

- Two times faster rise and descent than most lifts on the market. 25 seconds to full rise (most lifts are in the 45-60 second range) and 19 seconds to lower to the ground (most lifts are 35-50 seconds).
- DC power reduces operating costs. Uses two standard 12v car batteries, not included. Has built in charger that uses 110v, eliminating need for expensive 220v connection.
- Spotline™ motion-activated laser helps tech center vehicle in the bay on the first try, saving time spent repositioning the vehicle.
- Available for 2-post surface or in-ground lifts.

Shown: 39-SPOA7-HY-SE 7,000 lb. capacity asymmetric lift, arm/pad hybrid Shockwave™ Equipped

# On-Car Brake Lathe

PRM92-5DRO

## 38-PFM92-5DRO Base Lathe Package

Includes accessory kit and 5 adapters.

**\$9,190.00**

List Price \$9,748.00

### On-Car Brake Lathe

The PFM92-5DRO comes complete with Speed Lock cutting head. This feature allows the technician to shave up to a minute more off the already incredibly fast process time of Pro-Cut PFM lathes by eliminating the need for hand tools during set up. Sound easy? You bet! **In as little as 7 minutes per rotor, your techs will be matching and re-finishing rotors** with the highest degree of accuracy available today.

38-50-1200UPG

**\$1,495.00**

List Price \$1,619.00

### G2X / Upgrade

Upgrade your DRO lathe the "SMART" cutting head. G2X turns the lathe cutting head into a live micrometer with rotor thickness shown in inches or millimeters on the LED display.

- 1 LIVE ROTOR THICKNESS MEASURING
- 2 ALL NEW! - SMART CUTTING HEAD

38-50-1360

**\$3,495.00**

List Price \$3,790.00

### GYR / Upgrade

Scanner captures specs for each rotor while GYR application directs the technician through the brake job insuring that specs are met every time. Finished Brake job data is saved to the computer.

- 1 ROTOR SPECS for EVERY VIN
- 2 COMPUTER DIRECTED IN-SPEC REPAIR
- 3 INSTANT REPAIR REPORTS
- 4 ALL HISTORY STORED

G2X Upgrade Package includes 38-50-1200 cutting head, linear transducer, gpm module/computer board, and cables. GYR Upgrade Package includes the command center, touch screen tablet, scanner, vehicle vin and rotor data, & GYR application. **The GYR upgrade package REQUIRES the G2X upgrade package.**

# Expert Service Equipment & Systems Planning...

## At No Cost to You!

### FOUR Easy Steps:

# 1

#### Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

# 2

#### Equipment & Systems Needs Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

# 3

#### Detailed Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment & systems budget.

# 4

#### Project Coordination & Support

Single point of contact for service equipment and installation.

### Most architects and contractors don't understand the needs of a service facility—we do!

Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the BMW-approved equipment—where to place it for the best usage and work flow throughout the shop and how to get it installed. **We are the experts!**

### Let our experts make sure your facility:

- Accommodates Future Vehicles
- Provides Layout Efficiency
- Maximizes Shop Throughput

Special lease programs available for new facilities. Lease rates will vary. Please call for details.

Call today to speak with an Equipment & Systems Planning Specialist!
