Hunter has the Perfect Tire Changer to fit Your Service Profile

1-TCA34W
NADA \$18,355.00
 Dealer Price \$19,789.00

Auto34 Tire Changer

Hunter's Auto34 leverless tire changer includes automated functions and unique design elements to service the toughest wheel combinations with effortless operation.

Features:

- The center-clamping wheel support accommodates rims up to 34 inches and adjusts to three clamping heights.
- The self-inserting, ultra-thin tool head safely mounts and demounts tires in one fluid motion, eliminating the need for bead levers.
- The powerful motor exerts over 850 foot-pounds of torque to service even the most stubborn tires beads.
- Bead-loosening rollers gently roll the bead from the rim, yet are strong enough to safely hold the tire stationary to complete match-mounting procedures.
- Only three switches and one foot pedal control virtually all tire changing operations.

1-TC3715EW
NADA \$12,629.00
 Dealer Price \$13,616.00

TC3700 Tire Changer

Hunter's TC3700 tire changer handles the world's toughest high-performance tires and wheels with simple and safe operation.

Features:

- The center support with Quick Clamp provides the flexibility to mount wheels ranging from 10" to 28" with the same ease.
- A new optional Bead Press Arm pushes and holds stiff sidewalls in the drop-center position to ease demounting and mounting by greatly reducing stress to the bead (standard on TC3715E and TC3715EW models).
- The floating articulated mounting arm and polymer mount head follow the rim closely, reducing stress on the bead.
- The bead-loosening roller system safely helps demount and mount tires and complete match-mounting procedures.
- Optional pneumatic wheel lift available.

1-TCX515E
NADA \$5,570.00
 Dealer Price \$6,159.00

TCX515 Tire Changer

Hunter's TCX515 tire changer combines a traditional design with advanced capabilities to provide superior service with simple operation.

Features:

- The twin-cylinder tabletop clamping system handles 6- to 26-inch wheels.
- The standard bead press arm helps clamp, demount and mount difficult wheel assemblies.
- The familiar swing-arm design locks rim diameter for same-sized wheels.
- The improved motor has increased torque over previous models and the fastest speed in its class.
- Includes both steel and polymer mount heads.

1-BL505D-AB shown with optional HunterPro Level IV adapter kit and storage drawer.

Hunter BL505 Combination Brake Lathes

The Hunter BL505 brake lathe features a unique design that allows the operator to change the setup from rotors to drums and vice versa with unprecedented ease and speed.

- A choice of optional HunterPro adapter kits are available to customize the lathe to match the service profile of your shop.
- An infinitely adjustable feed rate provides a dial-in fast rate for rapid material removal, very slow for final surface finish or any rate in between to perform one-cut passes.
- Three easy-to-access spindle speeds allow the correct speed for all size workpieces. No tools are required to change speeds.
- The optional Digi-Cal Auto Measurement displays depth of cut for rotors and drums and also measures thickness, drum diameter and total indicated runout of the workpiece.
- The optional Dust Containment System acts as an environmental enclosure that captures chips and iron dust particles that can become airborne.

Road Force® GSP9700

Hunter's Road Force® diagnostic system performs a simulated road test on the wheel assembly to quickly identify and diagnose tire/rim-related vibration and tire-pull problems.

Exclusive Road Force features:

- The Road Force roller applies up to 1,250 pounds of pressure against the wheel assembly to detect non-balance-related issues. Unlike non-contact measurement, the roller samples the entire footprint of the tire, including the sidewall's contribution to ride quality.
- StraightTrak® LFM (Lateral Force Measurement) assesses the lateral forces in tires that cause pulls and drifts and provides corrective measures to minimize, offset or eliminate the problem.
- The ForceMatching® procedure finds the stiffest area of a tire's sidewall and the lowest spot on a rim to be marked and matched to cancel vibration caused by radial force variation.
- TranzSaver™ compares tire circumferences as specified by OEs to prevent damage to AWD vehicles.

Price does not include mounting adapters. Adapters sold separately.

Road Force GSP9700 machines starting at \$10,390
 (1-RF00 price shown)

SmartWeight® Balancer

Hunter's SmartWeight balancer packages the capabilities of fast, accurate balancing service in a cost-effective design that will increase the productivity and profitability of any shop.

Exclusive Road Force and SmartWeight features:

- SmartWeight® balancing technology minimizes correction weight usage and maximizes productivity by reducing wheel weight costs by 30% to 40% and speeding service time with more single-spin balances.
- TPMSpecs™ provides vehicle-specific TPMS information, including sensor type, tools needed and reset procedures, on-screen in an easy-to-understand format.
- The HammerHead™ TDC and BDC weight placement lasers guide the operator to the precise top-dead-center and bottom-dead-center locations for weight placement. The HammerHead TDC laser is an optional feature and the BDC laser is standard.
- The CenteringCheck® feature ensures a mounted wheel is properly centered to ensure the most accurate balance.
- Automatic Weight Mode Detection eliminates the need for the technician to select balance modes, reducing service time and possible entry errors.
- The optional, integrated wheel lift allows a single technician to easily mount and center heavy wheel assemblies, which helps prevent potential injuries and fatigue.

- New balancer software supports the use of a bar code scanner to instantly access TPMS information by simply scanning the VIN. (Bar code scanner sold separately.)

SmartWeight balancing machines starting at \$5,100

Alignment Systems and Lifts

NEW! HawkEye Elite® Alignment Systems

Hunter's HawkEye Elite® systems elevate alignment service to a new level of productivity. Patented QuickGrip™ adaptors and three-dimensional targets work with high-resolution camera sensors and the most powerful alignment software in the industry to help shops take full advantage of one of the most profitable auto services.

Equipment shown:

1-WA445
Console

NADA \$14,790.00

Dealer Price \$15,948.00

1-HE421FC
Sensors

NADA \$11,880.00

Dealer Price \$12,809.00

Features:

- The most extensive vehicle information database in the industry includes over 30 years of vehicle specifications and vehicle-specific procedures to guide alignment adjustments.
- Patented, high-resolution four-camera system continuously monitors targets at each wheel and instantly updates adjustment readings on-screen.
- 3D modeling of wheel position provides the most accurate alignment measurements.
- Quick roll-forward compensation, exclusive to Hunter, allows a technician to compensate all four wheels and capture initial measurements in one motion.
- Detailed color printouts help explain needed parts and repairs and document completed work.
- A digital library of instructional videos, vehicle-specific photos and illustrations can be used to educate technicians and customers alike.
- The award-winning CodeLink steering system reset device and a VIN bar code scanner are included as standard accessories.
- Fully-Integrated Alignment capability minimizes steps and streamlines the alignment process by automating manual tasks and simplifying procedures.
- Supports the use of a drive-on camera* to assist with positioning the vehicle on the lift and the TouchRemote™ feature, which allows operation of the system remotely using an Apple® iPhone®, iPod touch® or iPad® device.**
- Choose from a variety of console styles, sensor configuration and display sizes.

* Drive-on camera sold separately.

** TouchRemote requires free app from Apple iTunes® store and an Apple iPhone, iPod touch or iPad, sold separately.

Set up in seconds instead of minutes with QuickGrip Adaptors and Three-Dimensional Targets...

- Adjusts easily to various wheel sizes.
- Simple, one-touch lock lever – no more knob twisting.
- Grips tire tread – no metal-to-metal contact.
- No electronics at the wheel.
- Easy-to-handle lightweight, compact design.
- Shop-tough polymer construction.
- Covers assemblies up to 37 inches in diameter.

NADA \$23,729.00
Dealer Price \$25,582.00

Save more space with a flush-mount installation. Flush-mount installation is available for all RX models at no extra charge.

In-Ground and Surface Two-Post Lifts, Workbenches and Storage

SmartLift® In-Ground Lifts from Rotary Lift

With over 50,000 units in operation, a self contained and environmentally-friendly operation, this lift has become the preferred choice in new facility construction.

Features:

- The TRIO™ SmartLift features a low-profile yoke design and greater drive-thru clearance than other models.
- The new arm design has 18% more reach with a shorter arm!
- Multi-position adapters have finite adjustment, allowing pinpoint placement of adapter to lift point.
- Retains all features of previous generation SmartLifts, including total containment, ease of service and optional Liquid Detection System™ (LDS).

Models:

39-SL210W-RA

10,000 lb. capacity, wide drive-thru in-ground lift with Trio arms and rubber adapters

NADA \$7,225.00

Dealer Price \$7,821.00

39-SL210iW-RA

10,000 lb. capacity, wide drive-thru in-ground lift with Trio arms, LDS and rubber adapters

NADA \$7,525.00

Dealer Price \$8,145.00

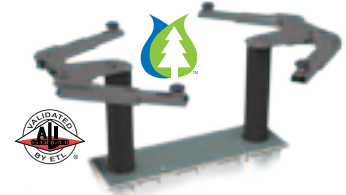

39-SL210-MP8

8,000 lb. capacity in-ground lift with moveable pads (does not include TRIO arms).

Dealer Price \$7,820.00

THE NEW SMARTLIFT®

Shown: Model 39-SL210iW-RA with 3-stage arms and polymer RA, adapters - TRIO only available in 10,000 lb. capacity.

Introducing the World's Fastest Lift!

Shockwave™ Equipped Rotary Lifts will help you achieve your goals of greater technician productivity and higher profits. Designed for fast-service bays, these lifts are the fastest in the world. Only available from Rotary.

Features:

- Two times faster rise and descent than most lifts on the market. 25 seconds to full rise (most lifts are in the 45-60 second range) and 19 seconds to lower to the ground (most lifts are 35-50 seconds).
- DC power reduces operating costs. Uses two standard 12v car batteries, not included. Has built-in charger that uses 110v, eliminating need for expensive 220v connection.
- Spotline™ motion-activated laser helps tech center vehicle in the bay on the first try, saving time spent repositioning the vehicle.
- Multiple options for engaging the vehicle. You pick.
- Available for 2-post surface or in-ground lifts.

Models:

39-SPOA10-RA-SW

10,000 lb. lift, flip-up adapters, DC power.

NADA \$5,368.00

Laptop Cart

This cart answers the need for a smaller high-quality cart that can transport and secure laptops used in shop environments. The small profile saves space, while the extended base gives stability. Locking cover secures laptop when not in use. Enclosed compartment has locking door. Bottom shelf can be used to mount power strip or hold external power source. Optional A1617DRW Pull-out drawer helps organize and access diagnostic accessories and tools.

Air Compressors

Ultra Pack Air Compressors

Curtis Toledo Ultra Pack compressors come as a complete ready to go package with all of the accessories needed for most shops. This includes automatic tank drains, radiator style air-cooled after cooler, oil level sight indicator, low oil shut down, tank vibration isolator pads and factory oil fill.

Air Compressor Features:

- Made in the USA.
- Comes with a mounted and wired magnetic starter.
- Compressor pumps are cast iron.
- Five-year warranty on the pump motor and tank included.
- All other components are warranted for one full year from installation date.
- Start-Stop control, ASME safety valve, ASME air receiver, pressure gauge, intake filter-silencers, tank shut off valve, manual tank drain and totally enclosed belt guard are standard.

Curtis®

Champion Duplex Air Compressors

Duplex air compressors are for extra air delivery when you need it without wasted space. Duplex air compressor systems allow your application the flexibility of single operation, alternating between compressors, or duplex operation to meet high air demand.

Duplex Air Compressor Features:

- Utilize 2 two-stage splash-lubricated compressor pumps.
- Mounted on a single horizontal receiver.
- Two mounted starters and one alternator.
- Two NEMA-rated electric motors.
- Two air-cooled After-Coolers.
- Vibration isolator pads.
- Automatic tank drain.
- Two low oil level monitors.

NADA \$14,545.00

Dealer Price \$15,062.00

38-PFM92-GYX/5 **Base Lathe Package**

Includes: New trolley, parallel arm cutting head, on-board computer system with GYR firmware and USB port, PFM9.2 lathe, five-adapter package, set-up and training.

NADA \$10,120.00

Dealer Price \$10,733.00

The new 38-PFM92-GYX uses the standard PFM9.2 body with many of the same features as the essential 38-PFM90.5. New product design provides for greater service efficiencies.

Give Your Customers Total Battery Service ... FAST!

This all-in-one portable battery diagnostic station offers intelligent, controlled, and rapid charging combined with battery state-of-health analysis.

Routine maintenance checks are performed quickly and efficiently by identifying batteries nearing the end of their useful life before they fail out on the road.

A required tool for Warranty Service on Infiniti vehicles!

Features:

- **Diagnostic Charging Mode** – quickly and efficiently assesses the condition of the battery and charges the good ones.
- **Power Supply Mode** – maintains the battery state-of-charge during vehicle reflash programming.
- **Jump-Start Mode** – 250 amp automated jump start routing.
- Manual Mode.

EZ Code Electronic Key Machine

Designed specifically for the North American automotive key markets, the EZ Code is the answer to most key cutting requirements. Quite simply, the EZ Code is affordable, easy to use and loaded with features.

Features:

- Electronically code cut or duplicates with accuracy with one machine.
- No kits or adapters required. Machine is self-contained.
- Unique automatic self-calibration eliminates potential for operator error.
- All major North American and International manufacturers' key codes are preloaded.
- Preloaded and expandable database can be updated with SD memory card or with PC via USB Port.
- Key registration accounts for taper and position to allow for perfectly cut keys to OEM Manufacturers' specifications.

74-EZCODE

NADA \$3,580.00

Dealer Price \$3,916.00

Tri-Code H.S.

The Tri-Code H.S. electronic machine duplicates and cuts by code the "laser style" high security automotive keys. Designed with features considered most important by the automotive dealers, this machine is easy to operate, fast, and accurate.

Features:

- Internal database of high-security codes and specifications.
- Compensates for "worn" cuts by automatically adjusting to OEM original specifications.
- Delivers consistent, accurate and dependable results in less than 3 minutes.
- Unique three-position clamping eliminates the need for additional clamps.
- Fully updatable database via serial port and cable (supplied).
- Full three-year warranty for parts and labor (cutters not included).
- Instruction manual and video included.

Expert Service Equipment & Systems Planning...

At No Cost to You!

FOUR Easy Steps:

1

Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

2

Equipment & Systems Needs Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

3

Detailed Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment & systems budget.

4

Project Coordination & Support

Single point of contact for service equipment and installation.

Most architects and contractors don't understand the needs of a service facility—we do!

Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the TECH-MATE-approved equipment—where to place it for the best usage and work flow throughout the shop and how to get it installed. **We are the experts!**

Call today to speak with an Equipment & Systems Planning Specialist!
