

Special Trade-in Offer on John Bean Alignment Systems!

Arago V3D Imaging Alignment System

**SAVE \$5,275!
With Trade-in**

The Arago V3D is the industry's fastest, most accurate imaging aligner and is ideal for high-volume shops or those handling a wide array of vehicles.

Features:

- Ultra™ High-Definition (HD) cameras provide accurate, live measurements during the alignment process, allowing the technician to get immediate feedback on adjustments and guaranteeing precise results. They are also self-positioning, enabling them to adjust for surfaces that are not perfectly level.
- DigiSmart™ camera technology allows the cameras to follow the targets on the vehicle as it is raised and lowered, providing the technician the ability to work at any height – a serious productivity booster that promises less fatigue on your technicians.

FIRST IN IMAGING TECHNOLOGY!

V3D¹ and V3D² Imaging Alignment Systems

The V3D¹ and V3D² imaging alignment systems leverage patented imaging technology to provide accurate, real-time measurements that reduce setup and measurement times and generate serious productivity benefits. This proven technology is matched with easy-to-use software that will have your technicians getting readings in a matter of minutes.

Features:

- Ergonomic: Measures at multiple lift heights.
- Adaptable: Works on non-level surfaces.
- Easy-to-Use: Software guides the technician step-by-step through the alignment process and shows progress in real-time.
- Fast: Setup to readings in under 2 minutes.
- For more advanced capabilities including measurements of Scrub Radius*, Rolling Radius* and Caster Trail*, consider the V3D².
