\$19,114.00
List Price \$19,789.00

Auto34 Tire Changer

Hunter's Auto34 leverless tire changer includes automated functions and unique design elements to service the toughest wheel combinations with effortless operation.

Features:

- The center-clamping wheel support accommodates rims up to 34 inches and adjusts to three clamping heights.
- The self-inserting, ultra-thin tool head safely mounts and demounts tires in one fluid motion, eliminating the need for bead levers.
- The powerful motor exerts over 850 foot-pounds of torque to service even the most stubborn tires beads.
- Bead-loosening rollers gently roll the bead from the rim, yet are strong enough to safely hold the tire stationary to complete match-mounting procedures.
- Only three switches and one foot pedal control virtually all tire changing operations.

1-TC3710E
\$10,156.00
List Price \$10,645.00

TC3700 Tire Changer

Hunter's TC3700 tire changer handles the world's toughest high-performance tires and wheels with simple and safe operation.

Features:

- The center support with Quick Clamp provides the flexibility to mount wheels ranging from 10" to 28" with the same ease.
- The floating articulated mounting arm and polymer mount head follow the rim closely, reducing stress on the bead.
- The hydraulic bead-loosening rollers gently roll tires off or on rims. With the simple control, a technician can safely hold the tire while spinning the wheel to complete match-mounting.
- The optional pneumatic wheel lift is available.

1-TCX515E
\$6,528.00
List Price \$6,842.00

Expanded
Wheel Range!

NEW!

TCX515 Tire Changer

Hunter's TCX515 tire changer combines a traditional design with advanced capabilities to provide superior service with simple operation.

Features:

- The twin-cylinder tabletop clamping system handles 6- to 26-inch wheels.
- The standard bead press arm helps clamp, demount and mount difficult wheel assemblies.
- The familiar swing-arm design locks rim diameter for same-sized wheels.
- The improved motor has increased torque over previous models and the fastest speed in its class.
- Includes both steel and polymer mount heads.

1-BL505D-AB shown with optional HunterPro Level IV adapter kit and storage drawer.

Hunter BL505 Combination Brake Lathes

The Hunter BL505 brake lathe features a unique design that allows the operator to change the setup from rotors to drums and vice versa with unprecedented ease and speed.

- A choice of optional HunterPro adapter kits are available to customize the lathe to match the service profile of your shop.
- An infinitely adjustable feed rate provides a dial-in fast rate for rapid material removal, very slow for final surface finish or any rate in between to perform one-cut passes.
- Three easy-to-access spindle speeds allow the correct speed for all size workpieces. No tools are required to change speeds.

- The disc/drum control lockout and warning indicator light eliminates potential crashing of the machine in drum or disc modes.
- The optional Digi-Cal Auto Measurement displays depth of cut for rotors and drums and also measures thickness, drum diameter and total indicated runout of the workpiece.
- The optional Dust Containment System acts as an environmental enclosure that captures chips and iron dust particles that can become airborne.

List Price \$14,076.00

**Standard with Road Force
and SmartWeight Balancers**

TPMS Specs

Hunter's TPMSpecs presents thousands of TPMS reset procedures in a comprehensive, tech-friendly format.

- ✓ Identify each vehicle's sensor type, tools needed and OE reset procedure.
- ✓ Eliminate confusing and costly reference manuals.
- ✓ Prevent comebacks from not knowing proper procedures and techniques.
- ✓ Explain needed service with color printouts.

1-SW13

\$8,439.00

List Price \$8,848.00

Road Force® GSP9700

Hunter's Road Force® diagnostic system performs a simulated road test on the wheel assembly to quickly identify and diagnose tire/rim-related vibration and tire-pull problems.

Exclusive Road Force features:

- The Road Force roller applies up to 1,250 pounds of pressure against the wheel assembly to detect non-balance-related issues. Unlike non-contact measurement, the roller samples the entire footprint of the tire, including the sidewall's contribution to ride quality.
- StraightTrak® LFM (Lateral Force Measurement) assesses the lateral forces in tires that cause pulls and drifts and provides corrective measures to minimize, offset or eliminate the problem.
- The ForceMatching® procedure finds the stiffest area of a tire's sidewall and the lowest spot on a rim to be marked and matched to cancel vibration caused by radial force variation.
- TranzSaver™ compares tire circumferences as specified by OEs to prevent damage to AWD vehicles.

Price does not include mounting adapters. Adapters sold separately.

**Road Force GSP9700
machines starting
at \$10,945**

(1-RF00 price shown)

SmartWeight® Balancer

Hunter's SmartWeight balancer packages the capabilities of fast, accurate balancing service in a cost-effective design that will increase the productivity and profitability of any shop.

Exclusive Road Force and SmartWeight features:

- SmartWeight® balancing technology minimizes correction weight usage and maximizes productivity by reducing wheel weight costs by 30% to 40% and speeding service time with more single-spin balances.
- The HammerHead™ TDC and BDC weight placement lasers guide the operator to the precise top-dead-center and bottom-dead-center locations for weight placement. The HammerHead TDC laser is an optional feature and the BDC laser is standard.
- The CenteringCheck® feature ensures a mounted wheel is properly centered to ensure the most accurate balance.
- Automatic Weight Mode Detection eliminates the need for the technician to select balance modes, reducing service time and possible entry errors.
- The optional, integrated wheel lift allows a single technician to easily mount and center heavy wheel assemblies, which helps prevent potential injuries and fatigue.

- New balancer software supports the use of a bar code scanner to instantly access TPMS information by simply scanning the VIN. (Bar code scanner sold separately.)

**SmartWeight balancing machines
starting at \$5,373**

Fully-Integrated Alignment and Alignment Lift Options

TECH·MATE

NISSAN AUTHORIZED
TOOL & EQUIPMENT PROGRAM

1-800-662-2001 • nissantechmate.com

WinAlign® 11 Fully Integrated Alignment

WinAlign 11 fully integrates the functions of the console, sensors and lift into one highly efficient alignment system.

The FIA concept represents an alignment bay design engineered to minimize steps and streamline the entire process for maximum productivity by automating manual tasks and simplifying procedures.

FIA Fully Integrated Alignment

WinAlign software includes the most extensive vehicle information database in the industry and vehicle-specific procedures to guide alignments.

Set tire pressure quickly without cumbersome hoses and gauges with optional Inflation Station.

Lift-activated cameras provide instantaneous adjustment updates.

Optional PowerSlide system auto-locks turnplates and slipplates, removing the hassle of lock-pins.

Instantly recall specs and vehicle-specific procedures with a VIN bar code scanner (sold separately).

Optional lift brackets store targets and adapters within arm's reach of each wheel to save steps.

1/2 Ton Capacity Telescopic Air/Hydraulic Transmission Jack

Designed for the removal, installation and transportation (in the lowered position) of transmissions and transfer cases on passenger cars, vans and light trucks that are raised by an in-ground or above-ground lift.

Features:

- Air/hydraulic foot pump provides hands-free operation and easy, convenient lifting.
- Metered pump valve provides safe lowering of load.
- Fully adjustable universal saddle with hand-adjustable corner brackets and safety chain.
- Safety overload system prevents jack from being used beyond its rated capacity.
- Two-stage flash-chromed rams inhibit rust from entering hydraulic system.
- Wide base with four easy-rolling 4" diameter polyurethane thread, swivel-ball-bearing caster wheels (one is a locking caster wheel) provides stability and easy maneuvering.

PFM 9.2™ GYR // VALIDATED BRAKE SERVICE

Pro-Cut has taken the industry-standard PFM 9.2 on-car brake lathe and brought it into the information age. The **PFM 9.2 GYR** directs the technician to make in-spec repairs and captures the finished metrics (rotor thickness and run-out) of **every** rotor machined! Finished results are automatically saved to an on-line database and can be printed for customer and/or warranty reimbursement. The GYR System provides management with the means to set and successfully manage a single, profitable policy for brake repair.

GYR KEY FEATURES

1. Captures **VIN number** of every vehicle serviced.
2. Directs the technician to make **in-spec repairs every time**.
3. **Automatically captures finished dimensions** (thickness and run-out) of every rotor serviced.
4. Provides **customer-friendly print-outs** summarizing each repair.
5. **Data from each brake job automatically saved** to on-line database for easy reference.
6. **Built-in business center** allows management to track lathe use and profitability.

HOW THE GYR WORKS

- 1 Technician scans vehicle, VIN number captured and rotor specs loaded on netbook.
- 2 GYR application directs the technician to stay within vehicle specifications.
- 3 Data is saved on netbook computer and on-line. Results can also be printed out.
- 4 A GYR BRAKE JOB IS STILL 9 MINUTES/ROTOR! INCREASED QUALITY and CONSISTENCY with NO LOSS IN EFFICIENCY!

Battery and Electrical System Diagnostics

**If your shop needs an additional diagnostic station,
NOW is the time to buy!**

A required tool for Warranty Service on Nissan vehicles!

This all-in-one portable battery diagnostic station offers intelligent, controlled, and rapid charging combined with battery state-of-health analysis.

Routine maintenance checks are performed quickly and efficiently by identifying batteries nearing the end of their useful life before they fail out on the road.

Features:

- **Diagnostic Charging Mode** – quickly and efficiently assesses the condition of the battery and charges the good ones.
- **Power Supply Mode** – maintains the battery state-of-charge during vehicle reflash programming.
- **Jump-Start Mode** – 250 amp automated jump start routing.
- Manual Mode.

GLOBAL FINISHING SOLUTIONS™

GREAT FINISHES START HERE

GFS' Top-Line Performance Waterborne and/or Solvent Spray Booth: The ECO Ultra Plus 1

NISSAN
GREEN PROGRAM

Designed to meet the needs of today's high production waterborne body shops, ECO Ultra Plus 1 is energy-efficient, ecologically friendly and the ultimate solution to waterborne coatings.

Features:

- GFS' patented Controlled Airflow Ceiling [CAF] for optimized downdraft airflow.
- SmartCure control panel with programmable cure cycles for one-touch operation.
- High-efficiency direct-fired heat system with Variable Frequency Drives [VFDs].
- AdvanceCure Accelerated Airflow System for your optimum performance with low-VOC and waterborne coatings.

Call for Pricing

With the new VOC legislation deadline just around the corner, it's time to start thinking about how your shop will handle the change.

Easily retrofitted into any booth, GFS' AdvanceCure Accelerated Airflow System is the solution for faster curing of waterborne and solvent based coatings. The recently upgraded AdvanceCure system has improved airflow velocity and more powerful motors that accelerates the airflow in the paint booth, drawing vapors out of the coating much faster, curing all types of coatings in less time. Now available in three different configurations, Corner Towers, Sidewall Towers and Low-Profile Corner Tower, you will be able to retrofit almost any booth and be waterborne ready!

Nitrogen Tire Inflation System and Key-Cutting Machines

Portable Nitrogen Generator

Features:

- By Parker Hannifin Corporation – a leading supplier of nitrogen tire-inflation equipment worldwide.
- Parker Nitrogen is used in over 10,000 units worldwide.
- Flow rated at 145 psi, 68°F.
- Four stages of pre-filtration.
- Auto shut-off without the use of electricity.
- Performs consistently over a wide temperature range.
- Portable with 30-gallon tank – bring nitrogen to any service bay.
- Six-port manifold allows for the filling of spare tires – a fifth hose is included.
- Automatic counter for tracking your nitrogen business.
- Long-life battery that can be recharged while the machine is in use.

EZ Code Electronic Key Machine

Designed specifically for the North American automotive key markets, the EZ Code is the answer to most key cutting requirements. Quite simply, the EZ Code is affordable, easy to use and loaded with features.

Features:

- Electronically code cut or duplicates with accuracy with one machine.
- No kits or adapters required. Machine is self contained.
- Unique automatic self calibration eliminates potential for operator error.
- All major North American and International manufacturers' key codes are preloaded.
- Preloaded and expandable database can be updated with SD memory card or with PC via USB Port.
- Key registration accounts for taper and position to allow for perfectly cut keys to OEM Manufacturers' specifications.

Next-Generation Air-Conditioning Service and Battery Booster Packs

R-134a Recovery/Recycle/Recharge – Acceptable for Warranty Use

Supersedes ACR2005-NI

The new SAE J-2788 standard requires that all R-134a service equipment manufactured after January 1, 2008, must recover 95% of the refrigerant and recharge to within 1/2 ounce.

Until now, the best charge accuracy that could be claimed by service machines is ± 0.88 ounce, a 3% error on a 2-pound system or 7% error on a 14-ounce system. Since The Robinair 48710 will recharge the vehicle to within 1/2 ounce of the charge capacity, you will avoid the dreaded "callback."

Features:

- Recovers 95% of refrigerant.
- Fully compliant with New SAE J-2788 Standard.
- Charge accuracy of $\pm 1/2$ oz.
- Automatic function.
- Vacuum leak test.
- Automatic refrigerant refill.
- Automatic air purge.
- Automatic oil drain.
- Refrigerant charging.
- Refrigerant management systems.
- Vacuum function.
- Integrated thermal printer.
- Temperature probes.
- Ambient temperature and humidity sensor.
- Real-time clock.
- Removable hoses.
- Encrypted Warranty Codes.
- Larger 1/4 VGA display.
- Software usability enhancements.
- Hose oil clearing.
- Notification light and tone for top of unit.
- Basic Help Screens guide you through the procedures.

Four Steps to Expert Service Equipment & Systems Planning at **No Cost to You!**

Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

Equipment & Systems Needs Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

Detailed Specifications and Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment & systems budget.

Project Coordination and Support

Single point of contact for service equipment and installation.

Most architects and contractors don't understand the needs of a service facility – we do!

Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of the close partnership with the OEM, we know the TECH-MATE-approved equipment—where to place it for the best usage and work flow throughout the shop and how to get it installed. *We are the experts!*

Call today to speak with an Equipment & Systems Planning Specialist!

Special lease programs available for new facilities.
Lease rates will vary. Please call for details.
